

Hi James

The label of Restricted access is used by EThOS for a range of reasons, e.g. if the university has declined to digitise because of third party copyright or author permissions, or if the thesis itself is restricted in some way at the university itself. This is the instruction we received from LSE for this thesis, and as you know we always follow the advice of our participating institutions when managing the thesis data in EThOS.

I believe LSE now hold a facsimile copy of the thesis. As the EThOS information indicates, users of EThOS are advised to approach the library of the university for further information.

With best wishes

Sara

**Subject:** EthOS FOI

Hi Sara

Please could you provide some information which would allow me to answer the following FOI:

*<https://ethos.bl.uk/OrderDetails.do?did=1&uin=uk.bl.ethos.652034>*

*There, you can see that this thesis is placed on Restricted Access. This is bizarre because the thesis was allegedly presented to the University of London libraries in 1984 and is already 35 years old. Please explain why it has been put on restricted access for so long. In fact, I can download or request copies of other LSE PhD theses of the same age on your eThOS. Why is the PhD thesis authored by Ing-Wen Tsai so unusual? From my understanding, PhD authors can request restricted access in exceptional situations, but only for two years at most."*

Many thanks

James
